Driving Innovation: Enhancing Vehicle Ownership with a Connected Flutter App

WHO WE ARE

" UB Technology Innovations is a leading provider of Flutter services, offering expertise in crafting exceptional mobile apps using the revolutionary Flutter framework. Our expertise assists clients in their digital transformation endeavors by streamlining the process and gaining a competitive advantage through rapid app deployment "

WHAT WE DO

- Streamlined data management process
- Cost-effective
- User interface
- Sustainability
- Scalability

THE CLIENT

Our client is one of the largest automobile manufacturers in the world. They produce nearly 10 million premium quality vehicles per year and provide reliable services to their customers.

CHALLENGES

The objective was to provide vehicle owners with a convenient and user-friendly app that offers features ranging from remote vehicle control to real-time diagnostics. The client requested our assistance in resolving the challenges:

1. User Adoption: Convincing users to adopt and trust new connected services can be challenging, especially when dealing with concerns about data sharing and perceived benefits.
2. Technological Innovation: Staying at the forefront of technological innovation requires constant adaptation and investment in emerging technologies such as AI, machine learning, and edge computing.
3. Customer Experience: Designing user-friendly interfaces and services that enhance the customer experience while driving can be challenging, especially as vehicles become more connected and offer more features.
4. Changing Consumer Expectations: As technology evolves, consumer expectations for connected services and data-driven insights can change rapidly. Meeting these changing expectations requires agility.

The mobile application was designed and developed as a comprehensive solution to connect the vehicles with their owners' smartphones. The app was built for iOS and Android platforms, ensuring compatibility with various devices.

Features:

1. Remote Start/Stop: Users could remotely start or stop their vehicles, allowing for pre-conditioning the car's interior temperature before entering.
2. Remote Lock/Unlock: The app enabled users to remotely lock or unlock their vehicle doors, providing convenience and security.
3. Vehicle Health Monitoring: Real-time diagnostics and health monitoring features provide users with insights into their vehicle's condition, including engine health, battery status, and more.
4. Location Services: The app allowed users to locate their parked vehicles, aiding in crowded parking lots.
5. Service Reminders: The app provided reminders for scheduled maintenance and service appointments, helping users stay on top of vehicle upkeep.
6. Emergency Assistance: In case of emergencies, users could access Roadside assistance.
7. User Profile: The app allowed users to create profiles for multiple vehicles in their household, streamlining management for families.

- Enhanced Cost-Efficiency: By utilizing cross-platform development frameworks like Flutter, the app achieved consistent functionality across iOS and Android devices, reducing organization development costs and streamlining maintenance efforts.
- Seamless Integration and Data Accessibility: Through robust API integration with backend systems, the app effortlessly accessed real-time vehicle data and enabled efficient control commands, resulting in improved organization's operational efficiency and better decision-making.
- Precise Location Services: Leveraging cutting-edge mapping and geolocation technologies, the app provided users with accurate and reliable location-based services, enhancing user experiences and facilitating efficient navigation.
- Engagement Boost via Timely Alerts: Incorporating push notification services, the app delivered timely alerts and reminders to users, increasing engagement, customer retention, and overall satisfaction.

ABOUT US

UB Technology Innovations, Inc. (UBTI) is a leading global technology solution provider with more than 3 decades of experience across all industries, specializing in Capital Markets (Asset Management), Logistics and Healthcare. We are the preferred Microsoft Gold Certified partner backed by a world-class team of Microsoft Certified experts with rich experience in Azure Cloud Platform and Data Analytics.
